

Aim 24: What happened at the end of the Stone Age? How did the Neolithic Revolution change the world forever?

HW: (To be determined)

Do Now: How is the system of ages related to tool technology?

(The Stone Age consisted of three time periods:

**1.Paleolithic or “Old Stone,”
period, 2 million years ago to
8,500 BC**

**2.Mesolithic or “Middle Stone,”
period, from roughly 8,500 to
8,000 BC**

**3.Neolithic or “New Stone,”
period, from roughly
8,000 to 3,000 B.C.)**

Paleolithic Period -was a time period in which early humans developed the first stone tools and lived as hunter-gatherers.

Neolithic Period -was a time period in which early humans not only used stone tools, but also lived in one place and started farming.

-The Neolithic Revolution would completely change the world. The development of agriculture, or farming, changed many aspects of daily life.

After the Neolithic Revolution people:

-lived in villages

-grew crops by farming

-had extra food ready to eat

Guided Read Aloud

Turn& Talk

1.Why were tools made of leather and vegetable fibers not well preserved?

2.What kind of tools were invented during the Paleolithic revolution?

3.How did life change after the Neolithic revolution?

Hey! I'm the hunter. You're supposed to be the GATHERER!

He was standing on the stuff I wanted to gather.

Indpt Practice

1. What was the major difference between the Paleolithic and the Neolithic periods?

2. What is agriculture?

3. How did the Neolithic revolution change the lives of early humans?
